

**Renaissance Investment Managers**

Dear Investors,

India got Manufacturing right, but need to fix Consumption

India reported yet another quarter of strong GDP growth. Q3FY24 real GDP growth at 8.4% was considerably ahead of estimates of almost all economists. Growth was fuelled by strong manufacturing and steady services. Recovery momentum, so far in FY24, has generally been better than envisaged at the beginning of the year. This has been led by factors like by recovery in capex cycle and front-loaded government spending, which was aided by strong credit growth as well. However private sector consumption still continues to be soft, and it needs to fire if India was to have a far more sustainable and durable long term growth. Within consumption also, it is the rural consumption which has still not recovered well (since post). This is owing to multiple factors viz. covid led impact of rural earnings, high inflation (persisting food inflation) and 2 consecutive years of low/ erratic rainfall. As things stand today, the projections for the upcoming monsoon season appears to be promising and that should be closely watched for signs rural recovery, if any.

### Gradual decline in fiscal deficit post covid

India has achieved another milestone in its journey to have a strong manufacturing led economy. The Union Cabinet approved the establishment of three semiconductor units – (1) -Tata Electronics will set up a semiconductor fab in partnership with Powerchip Semiconductor Manufacturing Corp (PSMC), Taiwan. This fab will be constructed in Dholera, Gujarat with an investment of Rs 910 bn, (2) Tata Semiconductor Assembly and Test Pvt Ltd will set up a semiconductor unit in Morigaon, Assam. This unit will be set up with an investment of Rs 270 bn. (3) CG Power, in partnership with Renesas Electronics Corporation, Japan and Stars Microelectronics, Thailand will set up a semiconductor unit in Sanand, Gujarat. This unit will be set up with an investment of Rs76 bn. All these three units will start construction within the next 100 days. The total investments committed, so far, is to the tune of ~Rs 1.2tn, which is a considerably large amount to begin with. However, the long term plan of the govt is even bigger. The investment in semi-conductors is contemplated to increase five times (Rs 7.5tn) in the next 4-5 years. The eventual objective is that India will not only be self-sufficient in meeting its domestic demand for semiconductors but will also start exporting them to the world. India has already witnessed initial success as far as manufacturing of electronic products are concerned. If India can pull-off its bet on semi-conductor manufacturing, it will go a long way in making India and strong manufacturing economy.

We are undoubtedly in a huge growth phase and during such phase of economic expansion, it is normal to expect a roaring equity markets. But at the same time, it is the nature of bull markets to create bubbles. Over the last 3-4 months, we have been highlighting our discomfort with the unjustified rise in low quality midcap/ small cap space. Finally, SEBI has also sprung into action with its cautionary statement to the mutual fund industry. How would things shape up going forward is difficult to say. Possibly, this bubble continues or perhaps there is a pause and a rally thereafter. There could be multiple scenarios. However, from our fund perspective, we continue to maintain our disciplined stock selection process to ensure long term sustained returns for investors. We would resist the temptation of investing in low quality names. Overall, we believe Indian economy is in a good health and impending political outcomes are unlikely to surprise. A confluence of strong growth and stable political regime, sets the stage well for a promising medium to long term growth outlook.

Happy Investing.

## Investment Philosophy

### Sustainable Quality Growth At Reasonable Price (SQGARP)

#### Sustainability

Companies with sustainable and durable business models.

#### Quality

Superior quality businesses as demonstrated by Competitive edge, Pricing power, ROE, FCF.  
Good quality and competent management teams.

#### Growth

Business that can deliver superior growth over medium term to long term.

#### Price

Ability to invest at reasonable valuations. Fair value approach to valuations.  
Focus on economic value of business.

**Statutory Details:** Renaissance Investment Mangers Private Limited ("RIMPL") is registered under SEBI (Portfolio Managers) Regulations, 1993 as a Portfolio Manager vide Registration No. INP000005455. RIMPL is also an Investment Manager to Renaissance Alternate Investment Fund – Category III which is registered with SEBI as Alternate Investment Fund under SEBI (Alternative Investment Funds) Regulations, 2012 vide Registration No: IN/AIF3/18-19/0549.
